PROFESSIONAL SUMMARY

Senior product manager focused on subscriptions, monetization, and lifecycle growth across consumer digital products. Builds pricing, checkout, and retention systems that increase revenue without adding unnecessary billing or support complexity.

Most of my work sits at the intersection of acquisition, renewal, entitlements, and self-serve subscription management.

SKILLS

Domains: subscriptions, monetization, acquisition, retention, lifecycle Methods: experimentation, dynamic pricing, funnel instrumentation, cancellation and save flows, GTM launches Tools: Looker, GA4, Jira, Figma, Zuora/Zephr, Stripe, Claude Code

EXPERIENCE

The Atlantic, New York, NY

Product Manager, Subscriptions & Monetization | Jan 2023 - Present

- Launched Premium Plus family plan, owning pricing, packaging, checkout, billing logic, onboarding, GTM, and analytics; increased acquisition AOV 30% while building reusable Zephr journeys and entitlements.
- Built High School Free Access around IP-based eligibility, onboarding, and maintenance in Zephr, opening Atlantic access to ~2,000 public schools and roughly 2M students and faculty.
- Ran acquisition pricing experiments on the product selection page and paywall, then extended that logic into DRP renewal pricing and non-Stripe dunning, creating a path to ongoing TK revenue lift beyond the initial 20% gain.
- Collapsed separate cancellation and auto-renew paths into one dynamic save flow, doubling traffic through the experience while holding save rate steady; added survey and discount logic that lifted deflection another 5%.
- Shipped self-serve upgrade and downgrade flows, the most-requested subscriber and customer care feature, giving users direct plan control and reducing support burden tied to plan changes.
- Supported a 6-month Stripe-to-Zuora/Zephr migration with lead engineers and executives on rollout scope, billing logic, and launch risk, unlocking faster account development and more flexible acquisition and retention journeys.

Associate Product Manager, Subscriptions | Sep 2021 - Dec 2022

- Ran acquisition pricing tests across offer pages, checkout, and annual versus monthly packaging, driving TK revenue lift and laying groundwork for the automated dynamic pricing framework.
- Built the sales tax engine that enabled collection in all 50 states, replacing absorbed tax cost with compliant checkout logic across the subscription business.

Family Dollar Store, New York, NY

Generalist / Manager | Jan 2009 - Jan 2021

- Ran store operations for roughly a decade across sales, merchandising, inventory, customer relationships, and expansion while taking on increasing responsibility over time.
 - Grew clothing revenue about 80% across 2018-2019 through seasonal buying, merchandising, and local customer marketing.
 - Negotiated 10-20% below-market wholesale pricing and priority access to high-demand merchandise, then helped finance and launch a Tampa expansion that lifted annual gross revenue 53%.
-

EDUCATION

Columbia University, Columbia College, New York, NY

B.A. in Economics-Political Science, 2021

B.S. in Mechanical Engineering, 2020
